

Dampening Pad

Supports the natural hoof mechanism

The dampening pad is designed according to the same principles as the jogging shoe. With a special designed rubber compound which provides the Pad with the best properties.

Extremely good memory, almost no deformation during usage. The superb flexibility, dampening and biomechanical properties makes this the best pad for both riding and rehabilitation.

Biomechanical and shock absorbing.

Super flexible and extremely robust.

All-purpose usage.

The dampening pad can be cut to fit the Slim sizes.

Size

The dampening pad is only about 4mm thick and fits sizes 7 to 16 cm.
