

Stud kit

Stud Kit Basic

The Equine Fusion Stud kit Basic is put together to give owners of jogging shoes the possibility to use the jogging shoes all year around.

The studs are easy to install and gives a very good grip on snow and ice without compromising the important properties in the jogging shoes.

Studs can be installed when needed, and removed when they are no longer needed with the same tool.

Very good grip on snow and ice.

It is highly recommended to use an Equine Fusion Dampening pad inside the Jogging shoes while using the studs. This is to ensure the most comfortable ride for the horse, and the best duration of the sole and studs.

Stud kit basic is for models Ultra and Ultimate. There is a separate kit for all terrain.

Recommended number of studs

Shoe Size	Number of studs - Stud Kit Basic
7	12 studs for each shoe
8	12 studs for each shoe
9	12 studs for each shoe
10	13 studs for each shoe
11	13 studs for each shoe
12	15 studs for each shoe
13	15 studs for each shoe
14	15 studs for each shoe
15	15 studs for each shoe
16	15 studs for each shoe

*Use of Equine Fusion Dampening pad is highly recommended to ensure the lifetime of the sole and studs.
